Introduction:

KFUPM is one of the greatest universities among Arab universities. Maintaining the systems there is done regularly. However, the registration system is quite old and it's better to be replaced with a new one. This project aims to produce a state of art registrar system to be used by KFUPM only. It's an online system that manages the students' registration, schedule, and grades. It's used as well by faculty members through which they can grade their students, take attendance, etc....

Key Features:

❖ Students System:

- Search for a course's sections.
- Add/Drop a course.
- Show the student's curriculum.
- Show the registration timings.
- Show the transcript.
- Show information of a course.
- Show the weekly schedule.
- Show information of academic advisor.

❖ Faculty System:

- Show information of the faculty member's sections.
- Assign the letter grade for each student in his sections.
- Enter the attendance of his sections.
- Show the weekly schedule.
- Show information about the students that he is advising.

❖ Chairmen/Deans System:

- Show information of the faculty members, students and sections in his department/college.
- Assign instructor, building-room number for a section.
- Add/Remove a student to/from a section as needed.
- Assign the academic advisor for each student in his department.

❖ Course Management System:

- Add a new section.
- Add/Remove a student to/from a section as needed.
- Show information of faculty members, students and sections.
- Assign registration timings: specify when is the time for students to register courses.
- Assign the date of the final exam for each course.
